

DIGITS OF PI SCARF

By Panandora

Needle Size: 13 US (9mm)

Yarn: Bulky, contrasting colors

Brand: Loops and Threads Charisma

Skeins: Two of each color.

You could use just about any yarn weight and needle size depending on how thick and long you wanted the scarf. Mine turned out to be 42 digits long, about 7½ feet long and 6 inches wide.

The entire scarf is double knit. The pattern is super easy. Each number has two rows between it. The chart shows the start of the scarf, 3.1415, and then the remaining digits you need.

Here's some mathematical constants to a bunch of places. Have fun!
