

# *The Ericaceae Cowl*

By Emily Violet

This pattern is from the A Yarnful Life pattern line and blog. Do not reproduce this pattern or sell any of the items made from this pattern. Thank you. <http://ayarnfullife.blogspot.com>

## Materials:

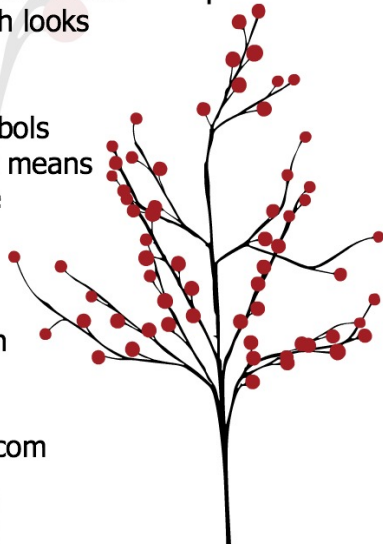

- size 7 (4.5 mm.) needles
- 180 yards worsted weight yarn  
(sample: One skein of Malabrigo Merino Worsted in colorway "Burgundy" - 210 yards)
- size 7 (4.5 mm.) cable needle/DPN
- tapestry needle
- skill and patience :)

## Pattern Notes:

The Ericaceae Cowl is a simple, yet unique cowl that's perfect for chilly evenings and walks through the park. The chain cable resembles small red (ericaceae) berries. The combination of the cable and garter stitch looks lovely.

Helpful Hint: When the symbols \* \* appear in the pattern, it means repeat what instructions are between the \* \* twice.
