

Add on flower border

Add flowers as a border on in the middle of any project!

The centers of these flowers are the space between the sts kind of like below.

You will put 2 sc in the top then turning your work clockwise put 3 more on the side, turn clockwise and put 2 in the bottom (top of last row sts) and then turn clockwise to put 3 more sl st into the first.

In same sl st space, *ch 2, dc 3 times, ch2, sl st.

Slip st in the next sc *

Repeat 4 more times, slip stitch behind first petals to first unworked sts from last row and continue adding flowers as you please.

If you work this into a row of dc the hole (center) will be larger...for smaller holes work in a hdc or sc.
