

Naiya

Gauge & Measurements

Gauge is not strict, but is approximately 12 stitches = 4 inches when blocked.

Naiya measures approximately 15 inches when blocked, and is designed to scrunch around your neck when worn. If the yarn you are using grows a lot when blocked in the lace pattern, you may want to cast on by 4 (or a multiple of 4) fewer stitches.

Materials

- 120 yards bulky alpaca yarn.
- 1 stitch marker (recommended), tapestry needle.
- Size US 10.5 circular needle, or size required to obtain desired fabric.

Abbreviations

CO – cast on

BO – bind off

EOR – end of round

k – knit

p – purl

YO – yarn over by bringing yarn to the front, then knitting the next stitch.

SL 1, k2tog, pssso - slip one stitch purlwise, knit two together, pull slipped stitch over.

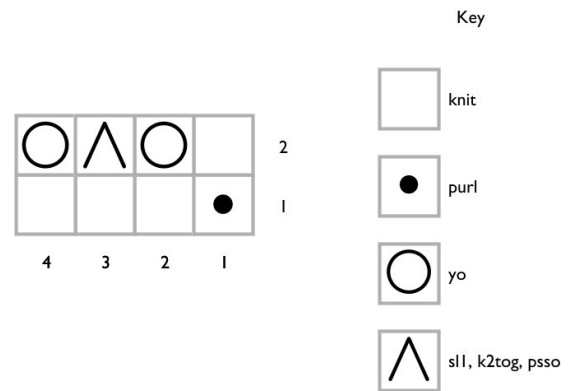

Instructions

CO 60 place EOR marker and join in the round, being careful not to twist stitches.

Rnd 1: * p1, k3; rep from * to end of round.

Rnd 2: * k1, YO, sl1, k2tog, pss0, YO; rep from * to end of round.

Repeat Rounds 1 and 2 until piece measures 9.5 inches unstretched; if you are working with a less-drapey yarn, you may want to make a shorter cowl. BO very loosely in patt after working Round 2 of the pattern.

Finishing

Weave in ends. Wet block to open lace. Enjoy!
