Modifying the pattern to fit

If you have larger or smaller wrists than me, you can easily modify the size of the finished gloves by increasing or decreasing the starting foundation chain.

If you want to make the cuffs longer, add more repeats of row 4.

To increase the length of the glove below the thumbhole, add repeats of round 5.

To increase the length of the glove above the thumbhole, add repeats of round 20

Assembly

- 1) On **Left Glove**, attach one eye to the centre back, over the black stripe. Use the long white tail and sew through the back loops of round 5 of the eye.
- 2) On **Right Glove**, attach two eyes to the centre back, over the black stripe. Use the long white tail and sew through the back loops of round 5 of the eye. To ensure the eyes stay together, sew a couple of stitches through the goggle rims where the eyes meet.
- 3) To attach the mouths, place the chain on the back of the glove and mark where the mouth will start and end. Using the long tails, secure the ends of the chain to these points. Sew the rest of the chain in place with the tails, before tying them off inside the glove.
