 19. SC2togx6 (6)
 20. Leave a long tail. Sew the remaining stitches together.

The apple is crocheted from the bottom to the top and looks like a red lemon right now but it'll will definitely look like an apple when you're finished.. Don't worry..

Two ways of making the stem

With Brown

Ch x13

Starting with the second chain from the hook, SCx12

With Brown

1. In an adjustable ring, SCx6. (6)

2-9. SCx6 (6) [8 rounds]

With both options, leave a really really long tail.

The right hand side is thicker but more sturdy as it has the pipe cleaner going down the centre. The left option has a more flimsy look as the end result but it's a lot easier to complete the assembly steps.

If you want to combine the two looks, you can use a lighter weight yarn, and using the right hand options, start with 8 stitches in the adjustable ring and add more rounds to the length you desire.

Leaf

1. In an adjustable ring, SCx6. (6)

2. SCx6 (6)

3. 2SCx6 (12)

4-6. SCx12 (12) [3 rounds]

7. SC2togx6 (6)

8. SCx6 (6)

9. Leave a long tail. Sew the last six stitches together then sew onto the stem.

Assembly

Sew the stem to the top of the apple (2) then push the needle through to the other tip (4). Pull tight so the stem goes into the apple. (5)

Sew a little star shape at the bottom tip then push the needle back the way you came. Pull tight so this also goes into the apple (6). Repeat a few more times through the apple to strengthen the shape.

And now you have an apple!

These are both crocheted from the same pattern. The apple on the right was crocheted on a day where I had just finished work so my stitches are a lot tighter. The one on the left was made on a nice lazy day off so my stitches are a lot looser.

The apple on the right was also stuffed more firmly whereas the one on the left was a little bit less stuffed so there was more space for me to squish it into an apple shape at the end of the assembly process.
